

Chapter 11 - Adjustments and Emissions Reduction Commitments

Emission reduction targets 2010 and Germany's compliance

This section describes the 2010 emission reduction targets established by the original Gothenburg Protocol and the first NEC Directive. It transparently explains Germany's (non-)compliance and illustrates the use of adjustments. Later emission reduction targets for 2020 or 2030 are not covered here, since the assessment can only be made with 2020 data, available from 2022 onward.
