

2.C.7.c - Other Metal Production

Short description

In source category *NFR C.7.c - Other Metal Production* thermal galvanisation is reported and the main pollutants are PM.

Method

Activity data

The yearly production figures were provided by the German association "Industrieverband Feuerverzinken e.V." (IFV) back to year 2010 ^[Lit. 1]. The figures are based on an annual query of its member companies. As the market share is about 45% the IFV extrapolates the total values for Germany on this basis.

Emission factors

The emission factor for TSP is determined on the basis of data supplied for the BREF FMP (Ferrous Metals Processing Industry). The split factors originate ^[Lit. 2]

Recalculations

Recalculations back to 2010 were necessary due to updated activity data and emission factor for TSP.

For more information on recalculated emission estimates for Base Year and 2018, please see the pollutant specific recalculation tables following chapter [8.1 - Recalculations](#).

Planned improvements

No improvements are planned.
