# 2.C.7.c - Other Metal Production

# Short description

In source category NFR C.7.c - Other Metal Production thermal galvanisation is reported and the main pollutants are PM.

## Method

#### Activity data

The yearly production figures were provided by the German association "Industrieverband Feuerverzinken e.V" (IFV) back to year 2010 <sup>[Lit. 1]</sup>. The figures are based on annual queries of its member companies. As the market share is about 45% the IFV extrapolates the total values for Germany on this basis.

#### **Emission factors**

The emission factor for TSP was determined on the basis of data supplied for the FMP (Ferrous Metals Processing) BREF review.

The split factors originate from [Lit. 2]

As produced amounts are confidantial no emission factors could be published.

### Recalculations

For more information on recalculated emission estimates for Base Year and 2018, please see the pollutant specific recalculation tables following chapter 8.1 - Recalculations.

### **Planned improvements**

No improvements are planned.
