

## Appendix 2.1 - Reporting of PM emissions

Documentation entries of the Central System Emissions database for the condensable fraction of PM<sub>2.5</sub>.

NFR categories with no reported activity or PM<sub>2.5</sub> emissions are excluded here.

The condensable fraction of particulate matter (PM<sub>2.5</sub>) is documented for all activities in the emissions database. A documentation entry has been created for each time series, indicating the following options for condensable particulate matter:

- Yes (measured/determined), the condensable fraction of PM<sub>2.5</sub> was measured and is included in the emission values
- No, the condensable fraction has not been determined and is not included in the emission values
- NA (no condensable PM<sub>2.5</sub> is generated in the process)
- Unknown, the condensable fraction for PM<sub>2.5</sub> is unknown and could be zero

Below is an excerpt from the database, showing the aforementioned documentation entries by source category.

| NFR Source Category |  | no documentation available | Yes                   | Not Applicable  | No                     | Unknown | Number of document entries |
|---------------------|--|----------------------------|-----------------------|---|------------------------|---------|----------------------------|
|                     |  |                            | (measured/determined) | (no condensable PM <sub>2.5</sub> are generated in the process) | (potentially possible) |         |                            |
