

## Appendix 2.1 - Reporting of PM emissions

The condensable fraction of particulate matter (PM<sub>2.5</sub>) is documented for all activities in the emissions database. A documentation entry has been created for each time series, indicating the following options for condensable particulate matter:

- Yes (measured/determined), the condensable fraction of PM<sub>2.5</sub> was measured and is included in the emission values
- No, the condensable fraction has not been determined and is not included in the emission values
- NA (no condensable PM<sub>2.5</sub> is generated in the process)
- Unknown, the condensable fraction for PM<sub>2.5</sub> is unknown and could be zero

Below is an excerpt from the database, showing the aforementioned documentation entries by source category.

NFR categories with no reported activity or PM<sub>2.5</sub> emissions are excluded here.

NFR Source Category		no documentation available	Yes	Not Applicable	No	Unknown	Number of document entries
			(measured/determined)	(no condensable PM <sub>2.5</sub> are generated in the process)	(potentially possible)
