

## 2.C - Metal Industry (OVERVIEW)

Metal production comprises the following categories and sub-categories:

|                                                                           |
|---------------------------------------------------------------------------|
| <b>2.C Metal Production</b>                                               |
| <a href="#">2.C.1 Iron and Steel Production</a>                           |
| <a href="#">2.C.2 Ferroalloys Production</a>                              |
| <a href="#">2.C.3 Aluminium Production</a>                                |
| <a href="#">2.C.4 Magnesium Production</a>                                |
| <a href="#">2.C.5 Lead Production</a>                                     |
| <a href="#">2.C.6 Zinc Production</a>                                     |
| <a href="#">2.C.7.a Copper Production</a>                                 |
| <a href="#">2.C.7.b Nickel Production</a>                                 |
| <a href="#">2.C.7.c Other Metal Production</a>                            |
| <a href="#">2.C.7.d Storage, Handling and Transport of Metal Products</a> |

In the CSE data base, the subcategory **NFR 2.C.1 - Iron and Steel production** includes sinter production, pig-iron production, oxygen steel production, electric steel production, hot and cold rolling and iron and steel castings.

The subcategories **NFR 2.C.2 - Production of Ferroalloys**, **2.C.5 - Lead production**, **2.C.6 - Zinc production** and **2.C.7.a - Copper production** are listed directly as such in the CSE.

**NFR 2.C.3 - Aluminium production** is subdivided into primary aluminium and remelted aluminium.

The subcategory **NFR 2.C.7.c - Other metal production** includes thermal galvanisation.
